Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This communication is in response to Applicant's amendment filed on May 16, 2008. Claims 1, 3, 4 and 6-26 are pending in the application.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1, 3, 4 and 6-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Volino US Patent No. 6,400,845 B1 in view of Risafi et al US Patent No. 6,473,500 B1

Claims 1, 3, 4 and 6-26, Volino discloses a method and corresponding system for

processing a point-of-sale transaction at a merchant terminal, comprising the steps scanning a personal identification document corresponding to a customer requesting a financial service at a merchant terminal; generating a scanned image of the personal identification document; identifying character data in the scanned image; comparing the character data to a document template corresponding to the personal identification document to generate customer data, mapping the character data using a document template to identify types of character data and assigning the character data as values for the identified types of character data to generate customer data used in processing the point-of-sale transaction, performing an optical character recognition process on the regions containing text to obtain customer data values, associating the customer data values with the definitions obtained from the template, and populating fields of a displayed form with the customer data values as claimed in claims 1, 3, 4 and 6-26 (abstract, figs. 2 ,3 5A, 6 and 10-12 and related text in the detailed description, and column 2, line 30 thru column 3).

Volino does not explicitly teach an interface configured to communicate customer data interpreted from the personal identification document to a host processing element that supports a financial service transaction via the merchant terminal.

Risafi teaches an interface configured to communicate customer data interpreted from the personal identification document to a host processing element that supports a financial service transaction via the merchant terminal (column 6, line 47 thru column 8, line 52). Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the teachings of Volino to include an interface configured

to communicate customer data interpreted from the personal identification document to a host processing element that supports a financial service transaction via the merchant terminal as taught by Risafi. One would have been motivated to do so in order to provide verification and/or authorization of data from the central processing element.

Response to Arguments

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.
